

PLEASE READ CAREFULLY

Our greatest concern is for your pet while he/she undergoes anesthesia. Because of this concern, we strongly recommend a pre-anesthetic blood profile be performed prior to surgery. The profile maximizes safety by alerting the doctors the presence of Anemia, Kidney and/or Liver disease, which could compromise your pet's ability to handle anesthesia. The results of this profile can alert your doctor to either adjust levels or delay the procedure.

The cost of the Pre-Anesthetic Blood Profile is: \$154.02

YES I want the pre-anesthetic bloodwork.

NO I decline the pre-anesthetic bloodwork.

MALES/CRYPTORCHID- If your pet has an retained/ undescended testicle and the Dr. has to go into the abdomen to retrieve the testicle there will be an extra charge of Abdomen Area **\$30.00- \$75**, **Inguinal Area \$20**. Yes I agree to pay the extra charge if my pet is a cryptorchid.

FEMALES/ IN HEAT/PREGNANT- If your pet is in heat or pregnant at the time of surgery, there will be a **\$18-\$30** fee to be paid before pick up. YES I agree to pay the extra charge if my pet is in heat or pregnant.

PAIN MANAGEMENT- The administration of pain management has been shown to speed the recovery process as well as lead to greater patient comfort. Therefore pain medication is highly recommended.

This is an **ADDITIONAL \$20-\$30**. YES I want pain medication for my pet. NO I decline pain medication for my pet.

MICROCHIP- A permanent microchip is inserted just below the skin surface in your pet. This microchip is programmed with a code that can be identified with a hand-held scanner. This procedure is most easily accomplished while your pet is under anesthesia. This is an **ADDITIONAL \$25.00** (normally \$35.00).

YES I accept the Microchip. NO I decline the Microchip.

FECAL- It is very important to have your pet tested for intestinal parasites every so often. We highly recommend for your pet to be tested every 6 months. While your pet is under sedation, it is the best time to screen for intestinal parasites. This procedure is an **ADDITIONAL \$19.50**

YES I want my pet screened for intestinal parasites NO I do not want my pet screened for intestinal parasites

HEARTWORM 4DX- Heartworm disease is extremely deadly. We recommend all pets to be on a monthly heartworm preventative; however, we do require a heartworm test if the pet is older than 6 months before we can dispense heartworm medication. Our heartworm test also tests for tick borne illnesses, such as Lyme disease and Ehrlichiosis. This is an **ADDITIONAL \$56.80**

YES ____ I want my pet screened for Heartworm disease. NO ____ I decline the heartworm test.

ELIZABETHIAN COLLAR – It is imperative that your pet does not lick or chew at, the surgical site during recovery. We HIGHLY recommend the purchase of this item to prevent possible complications after their surgical procedure.

ADDITIONAL \$25 ____ YES, I WANT TO PROTECT MY PET ____ NO, I DO NOT WISH TO PURCHASE

IV FLUID THERAPY – Your pet may not have an appetite for a day or so after their procedure. It is important to make sure that your pet is adequately hydrated before and after their surgery to prevent complications. Having an IV in place while under anesthesia, also provides quick access for the doctor if any complications arise.

ADDITIONAL \$75 ____ YES, I WOULD LIKE FLUID THERAPY ____ NO, I DO NOT WISH TO PURCHASE

EXAM/VACCINES- If your pet is NOT up to date on Rabies, DHLPP, Bordetella, and Canine Flu Vaccine we will vaccinate at the time of the procedure for an ADDITIONAL fee. We do require that all pets have an Exam and; Vaccinations to be current at the time of the procedure.

SURGICAL AND HOSPITAL AUTHORIZATION

I hereby consent to authorize Lanett Animal Clinic and staff to receive, prescribe for, treat or operate upon my animal(s).

The Lanett Animal clinic and staff are to use all reasonable precautions against injury, escape or destruction of the animal. I understand that all anesthesia involves some risk to my pet, but Lanett Animal Clinic will not be held responsible in any manner whatsoever.

I also understand that Lanett Animal Clinic is not staffed 24 hours a day and after hours treatment of patient is at the discretion of the veterinarian. In the unlikely event that your pet suffers from cardiac or pulmonary arrest while under anesthesia, please provide:

____ Life saving measures (needed injectable medicines, **CPR**) additional cost of **\$100-\$200**

____ Do Not Resuscitate (**DNR**)

**** As a routine, we will tattoo your pet after the surgical procedure****
